Kolibri FPGA Dongle

\$49.95

😊 1 in stock

SKU: LD-KOLIBRI

Categories: [Development](#), [Educational](#), [Electronics](#), [Embedded Systems](#), [Security](#)

Description

Description

Kolibri is a USB dongle with an FPGA and PMOD connector. It has an RP2040 MCU that allows the FPGA SRAM and onboard flash to be programmed over the USB connection using `ldprog`. The USB connection also acts as a USB-UART bridge to the FPGA.

Each order includes one Kolibri (two are pictured in order to show both sides).

Specifications

- Lattice ICE40HX4K FPGA
 - 7680 LUTs when using open-source tools
 - 2 PLLs
- 8Mbit (1MB) SPI NOR Flash (for gateware)
- 256Mbit (32MB) OPI PSRAM
- 1 12-pin Digilent Pmod™ compatible expansion port
- 1 white LED
- RP2040 MCU (Dual 32-bit ARM Cortex M0+)
 - 8Mbit (1MB) QSPI NOR Flash (for firmware)
 - 1 button for boot mode selection
 - 8 GPIOs routed to FPGA
 - USB Type-A male plug
- 32mm x 16mm board dimensions (~56mm total length)

- LED8 PMOD
- LED Matrix PMOD
- DDMI PMOD
- USB-UART PMOD
- WiFi/Bluetooth PMOD
- Ethernet PMOD

Resources

- Example gateway, schematic, documentation and a 3D-printable case are available on GitHub
- Component Datasheets (PDF)
 - ICE40HX
 - PSRAM
