what is ISC license?

The ISC license is a permissive free software license published by the Internet Systems Consortium (ISC). It is functionally equivalent to the simplified BSD and MIT/Expat licenses, with language removed that is made unnecessary by the Berne convention.

The ISC license is used by many projects, most notably the ISC's own software such as BIND and dhclient, which are both key components of many Internet infrastructures.

Here's the text of the license (as of my knowledge cutoff in September 2021):

```sql
Copyright (c) <YEAR>, <OWNER> Permission to
use, copy, modify, and/or distribute this
software for any purpose with or without fee
is hereby granted, provided that the above
copyright notice and this permission notice
appear in all copies. THE SOFTWARE IS PROVIDED
"AS IS" AND THE AUTHOR DISCLAIMS ALL
WARRANTIES WITH REGARD TO THIS SOFTWARE
INCLUDING ALL IMPLIED WARRANTIES OF
MERCHANTABILITY AND FITNESS. IN NO EVENT SHALL
THE AUTHOR BE LIABLE FOR ANY SPECIAL, DIRECT,
INDIRECT, OR CONSEQUENTIAL DAMAGES OR ANY
DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE,
DATA OR PROFITS, WHETHER IN AN ACTION OF
CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION,
ARISING OUT OF OR IN CONNECTION WITH THE USE
OR PERFORMANCE OF THIS SOFTWARE.
```

In short, the ISC license allows you to use, modify, and distribute the software without restriction, but without any warranty, and it requires attribution. It is one of the simplest open source licenses, which makes it popular for many projects.
